Last Friday, the Governor signed the capital bonding bill which includes funding for two new parking facilities on the capitol complex. A ramp will be built on the site of Lot F on the west side of the Transportation building that will hold approximately 480 stalls. In addition, a ramp holding approximately 400 stalls will be built on Lot L on the east side of the Judicial Center. The Department of Administration plans to "fast track" this project to the maximum extent possible. We will immediately begin the solicitation process for the design and construction team. As the design process begins, we will provide updates and estimates for construction milestones and completion.

This notice is being sent to all Lot X (Sears) contract parkers with an email address on file with Plant Management.
